HOW TO CREATE AN AWS ACCOUNT

Step 1: Open the Official AWS Website

1. Open a web browser such as Google Chrome or Microsoft Edge.
2. Visit the official AWS website: https://aws.amazon.com/
3. Click on the **Create an AWS Account** option.
4. The AWS account registration page will open.

aws

Try AWS at no cost for up to 6 months

Start with USD $100 in AWS credits, plus earn up to USD $100 by completing various activities.

Sign up for AWS

Root user email address

Used for account recovery and as described in the **AWS Privacy Notice**

AWS account name

Choose a name for your account. You can change this name in your account settings after you sign up.

Verify email address

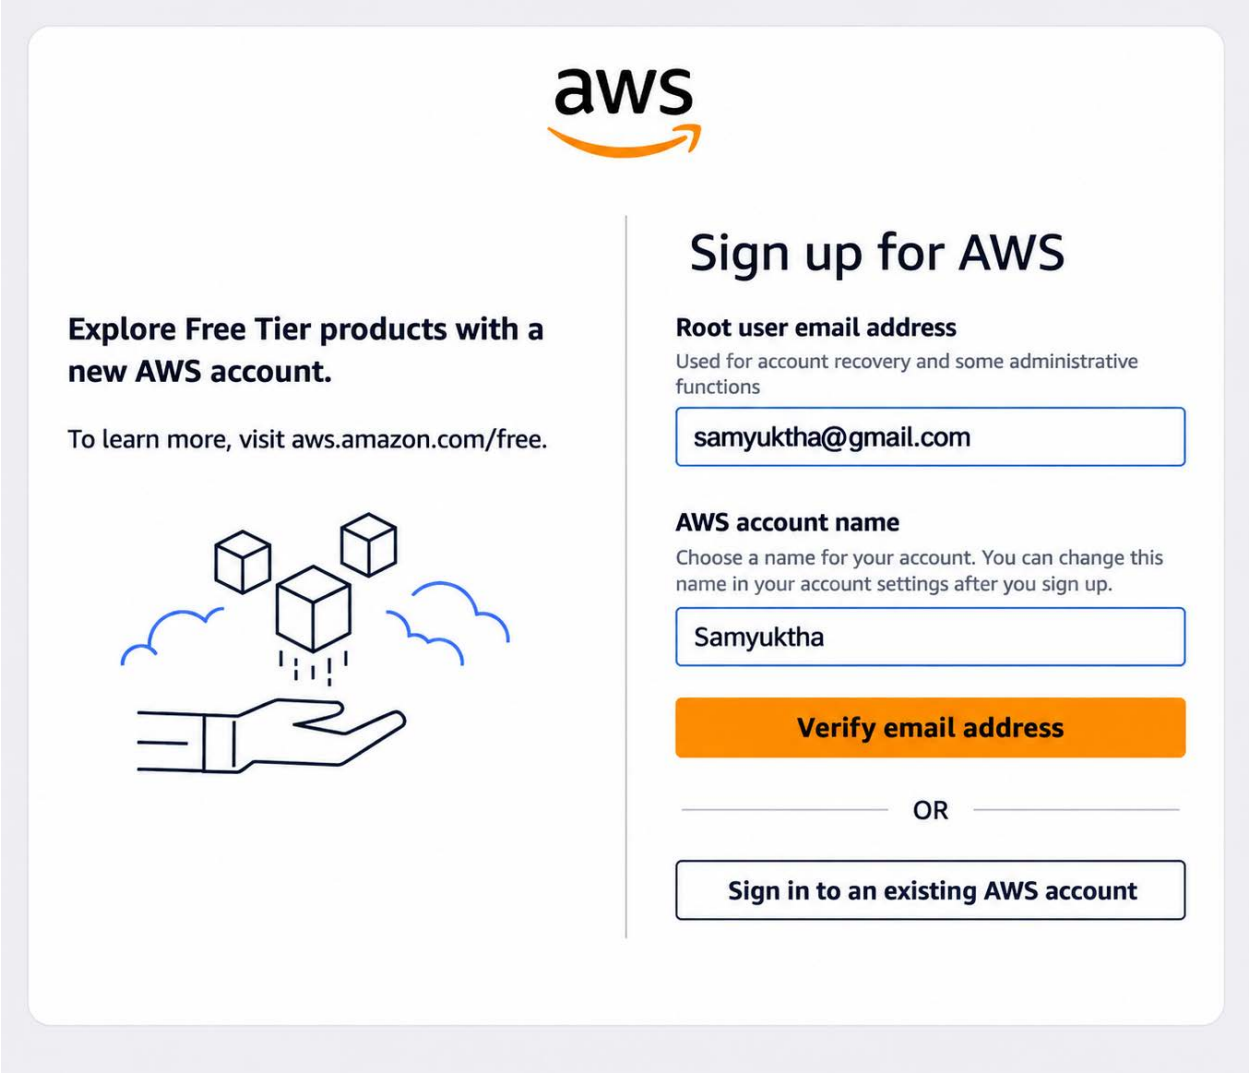

OR

Sign in to an existing AWS account

This site uses essential cookies. See our Cookie Notice for more information.

Step 2: Enter Email Address and AWS Account Name

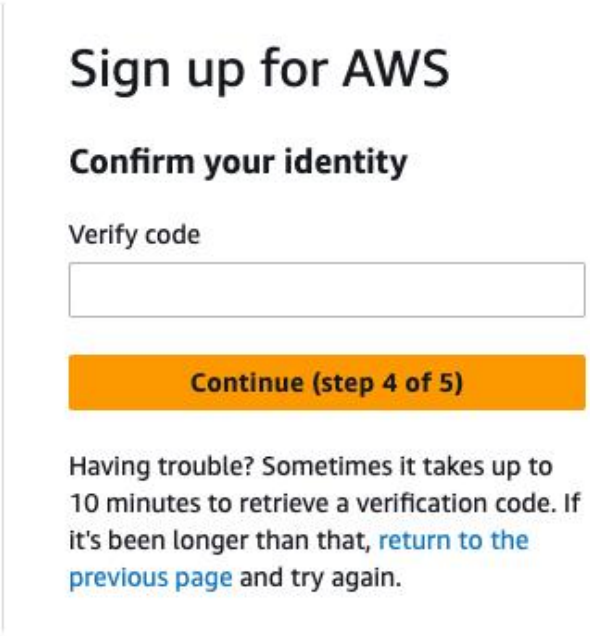

1. On the registration page, locate the **Root user email address** field.
2. Enter a valid email address that you can access.
3. In the **AWS account name** field, enter a suitable name, such as Samyuktha.
4. Check that both fields contain the correct information.
5. Click the **Verify email address** button.

Step 3: Verify the Email Address

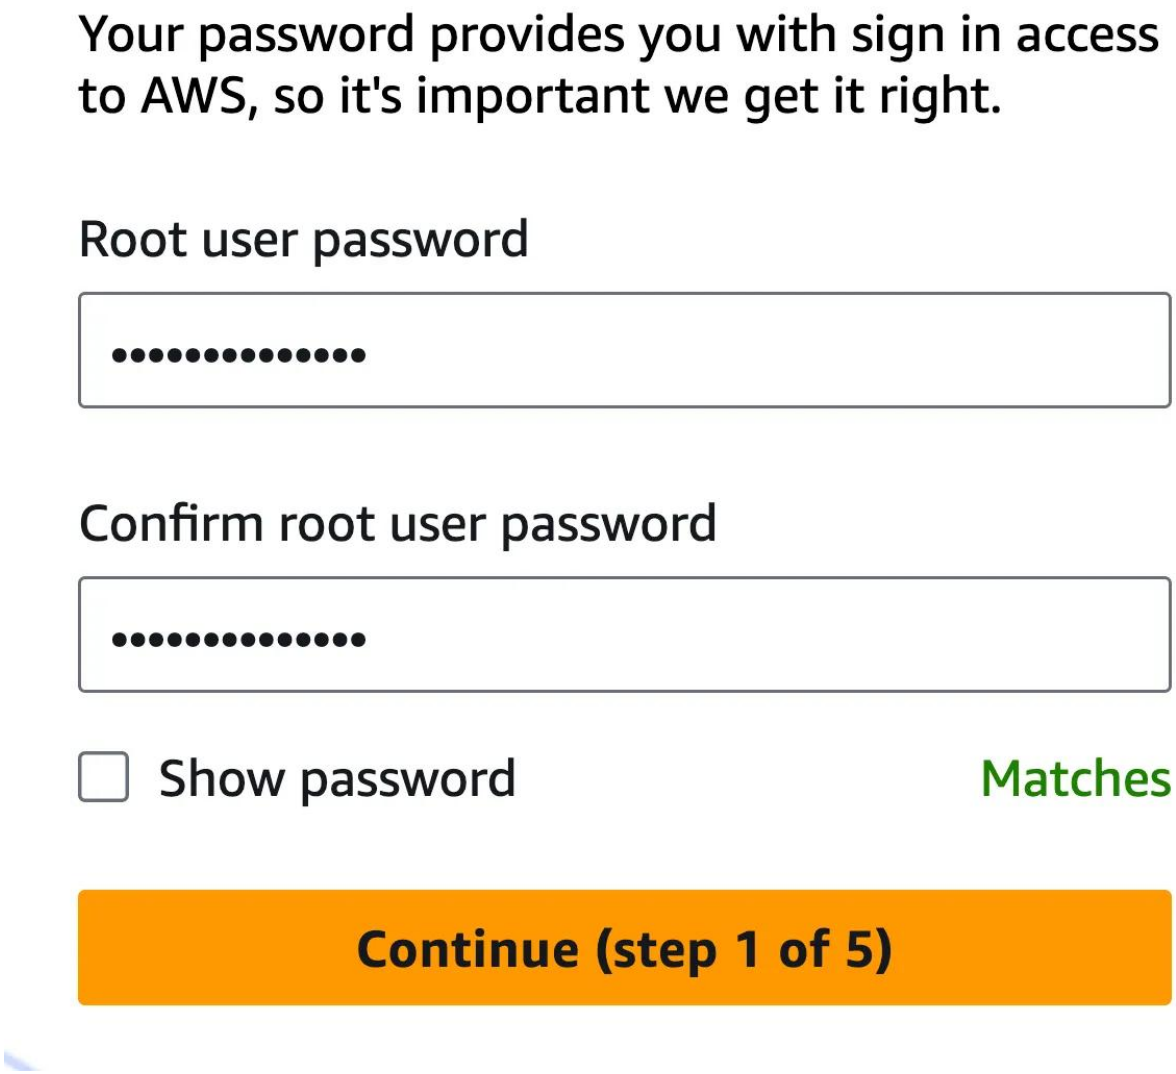

1. Open the inbox of the email address entered during registration.
2. Find the verification email sent by AWS.
3. Open the email and locate the verification code.
4. Enter the code on the AWS registration page.
5. Click the **Verify** button to continue.

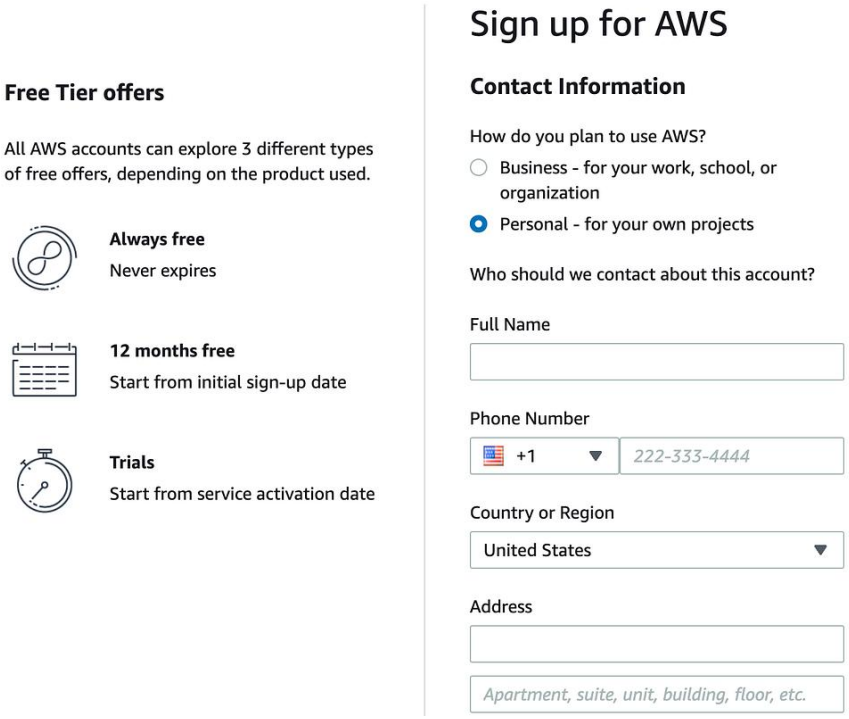

Step 4: Create a Password

1. Follow the instructions displayed on the screen.
2. Create a strong and unique password for the AWS root user.
3. Re-enter the password if a confirmation field is provided.
4. Click **Continue** to proceed to the next step.

Step 5: Enter Contact Information

1. Select the appropriate account type, such as Personal, if applicable.
2. Enter your full legal name.
3. Select your country or region.
4. Enter the requested address, city, state, PIN code, and phone number.
5. Review the information and continue.

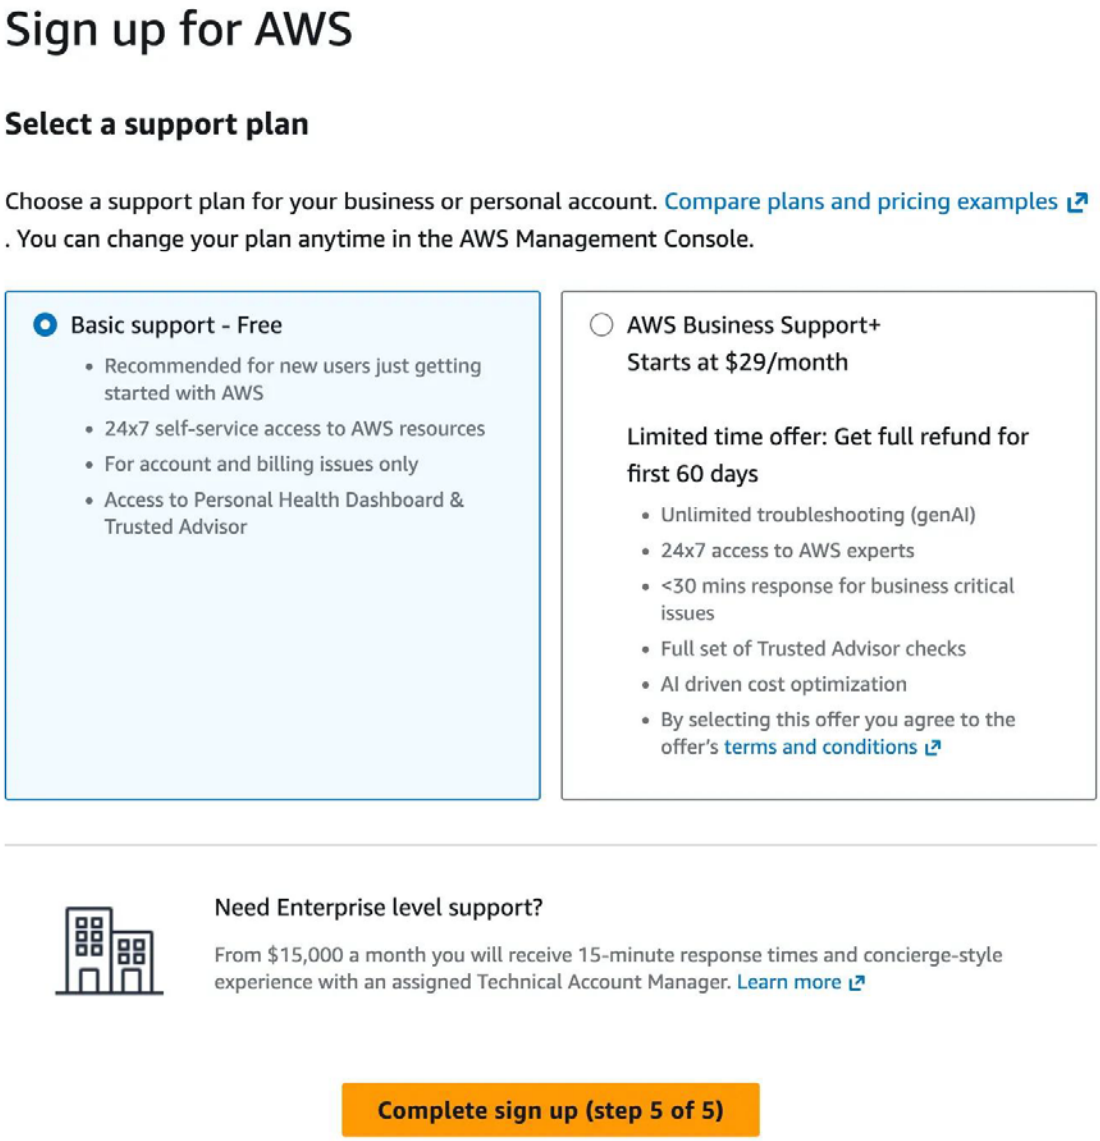

Step 6: Complete Payment and Identity Verification

1. Follow the instructions displayed by AWS for payment-method verification, if required.
2. Complete phone or identity verification if requested.
3. Review the terms and any applicable charges carefully.
4. Submit the information to continue with registration.

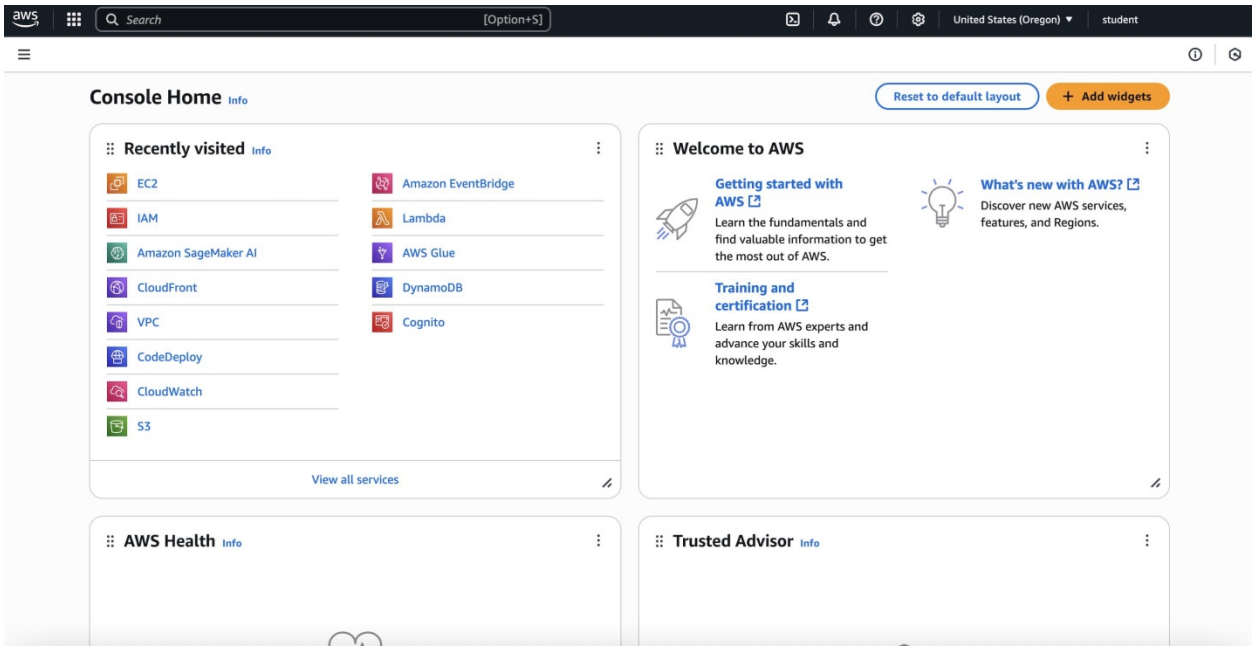

Step 7: Select a Support Plan

1. Review the support plans displayed during registration.
2. Read the features and charges associated with each option.
3. Choose the appropriate plan according to your requirements.
4. Continue to complete the registration process.

Step 8: Sign In to the AWS Management Console

1. Wait for AWS to confirm that your account has been activated.
2. Open https://console.aws.amazon.com/
3. Choose the root user sign-in option, if prompted.
4. Enter the registered email address and password.
5. Complete any additional security verification requested.
6. After successful login, the AWS Management Console home page will appear.

Security and Billing Precautions

- Use a valid email address that you can access.
- Create a strong and unique password.
- Enable multi-factor authentication (MFA) to improve account security.
- Never share passwords or verification codes.
- Review AWS pricing and free-tier usage limits before using services.
- Configure billing alerts to monitor usage and avoid unexpected charges.

Conclusion

Creating an AWS account involves registering an email address, verifying the email, creating a password, providing contact information, completing any required verification, selecting a support plan, and signing in to the AWS Management Console.

After successful registration, users can access AWS cloud services and begin learning about cloud computing. The exact registration screens may vary depending on AWS updates and the account registration process.
